# Senior Inventors' & Science Fair Conservation Award

Ausable Bayfield Conservation Authority  
Maitland Valley Conservation Authority  
Upper Thames River Conservation Authority

2006 Junior Science Fair  
Conservation Award Winners

A conservation education project of the Ausable Bayfield, Maitland Valley and Upper Thames River Conservation Authorities in co-operation with the Avon Maitland District School Board and Huron-Perth Catholic District School Board.

# Conservation Award

Help your students become the natural resource managers of tomorrow by doing an environmental science fair project today! The Ausable Bayfield, Maitland Valley and Upper Thames River Conservation Authorities, in co-operation with the Avon Maitland and Huron-Perth Catholic District School Boards will present a Conservation Award to encourage students to explore the complex and exciting field of conservation at the Senior Inventors' and Science Fair. Contact your Local Conservation Authority for more information.

*We would like to thank the family of Ross Duncan for their generous donation towards Science Fair activities.*

## Award Information

- presented at the conclusion of the Senior Inventors' and Science Fair competition.
- Award displayed in the winning student(s) school until the following year
- Award winner(s) will receive a memento and complimentary pass to a local Conservation Area for his/her achievements.

## Project Requirements

- The project must be an environmental/conservation project with a local focus.
- The basic project requirements defined by the Science Fair Committee.
- Competition for the Award is open to students in grades 7-9.
- Judging criteria for the Conservation Award will follow those set out by the Science Fair Committee.

## Topic Suggestions

**\*\*Remember all topics must have a local focus\*\***

- What is a watershed? What does it do? Why is it important? Build a watershed model.
- Flooding - Investigate the different methods used by Conservation Authorities for flood control (e.g. dams, wetlands, etc.).
- Investigate and determine what the benefits are to recycling and composting. What can be done with/ what happens to the materials that are recycled/ composted?
- Constructed wetlands
- Local species at risk - e.g. Eastern spiny softshell turtle, wood turtle, southern flying squirrel, queen snake.
- Renewable energy (e.g. solar, wind, geothermal).
- Climate change - how it affects animal migration and movement; changes to crop production; changes in plants.
- Invasive plants - what is their impact on native species? Where are they thriving? e.g. Purple loosestrife, garlic mustard, mullein.
- What are the benefits to growing native plants vs. non-native plants?
- Invasive species - what are they and why are they coming to Ontario? e.g. Emerald Ash Borer.
- Create your own report card for your home to look at how well your family handles composting, recycling, energy efficiency, etc.
- The effect of road salt on natural communities e.g. have municipal road salt plans improved/ reduced salt use? Look at how road salt can affect plants, water, etc.
- Waste disposal - rates of decomposition.
